

# Protecting your bed

---

The bed in your room or apartment has several covers. You can see what they are called and the order of them below. The covers are meant to protect the bed and are also a hygienic precaution. **Please use your own sheet on top of the waterproof cover.**

It is important that you **wash the waterproof cover when moving out.** Remember to put it on in the right order again (as pictured below). Furthermore it is important that you either take the mattress protector with you or throw it out when moving out. **If you forget to do so you will be charged a garbage fee.**
